Thanks for the new table. As far as data tabulation in a report, to the best of my knowledge, it is up to the Region.

This reminds me of something though: Regarding data tabulation in the HRS documentation record, there is a template for the entire documentation record. Do you have a copy of that? If not, I'd be glad to send you one. Thanks.

Katharine Lima

FYI - This table is slightly easier to follow for SW concentrations; however, it lacks some of the important side drainages' data, e.g., North Fk Cement Creek, South Fork Cement Crk, and Animas River upstr. of

Cement Creek.

Is there a recommended format HQ/CSC likes using for this sort of data tabulation?

Sincerely,

Sabrina Forrest

Subject: Upper Animas surface water data table

Here is the UpperAnimas surface water data table dates 6/13/11

Using UASW030 (Lower Ross Basin Drainage) as the background.

SCDM Environmental Acute and Chronic as benchmarks.

Cadmium toxicity 10,000. Copper and lead 1,000.
